SOURCE: GRAPHIC COMPETITIONS

The European Product Design Award 2020 recognizes the efforts of talented designers and design teams who aim to improve our daily lives with a practical and beautiful creation, designed to solve a problem, make life easier or simply spread joy.

Winning the European Product Design Awards is a prestigious accolade, giving you greater confidence and augmenting your global profile.

Entries can be submitted as conceptual designs, in progress, or as completed projects. The only restriction is that entries or completed projects must be no more than 5 years old. Submissions can be made as a Professional or as a Student.

Winners are chosen based on a single project – not for a body of work. You may submit an entry into multiple categories at the same time.

Entry fee starts at 100 USD.

ELIGIBILITY

Open to anyone aged 18+ residing anywhere in the world. Professional entries will be judged against other professionals and student entries against other students.

PRIZE

EPDA winners receive significant, international publicity and exposure. In contrast to many other design awards, all the associated perks of winning EPDA are included in the entry fee.

The European Product Design Awards annual yearbook is featuring in-depth coverage of the winners and a complete listing of all honourees, and it is distributed to an international audience of design and business executives.
