

Generative Art Award 2023

Category: [Multiple Disciplines](#)

Deadline: November 30, 2023

Website: graphiccompetitions.com

Generative Art may come in many forms, but the Generative Art Award 2023 specifically celebrates images that are generated from natural language descriptions (prompts) using AI-based computer programs. This unique award aims to showcase the artistic potential of images created entirely or partially using autonomous systems, providing a glimpse into the transformative impact of AI on the creative landscape.

The competition welcomes artists and AI enthusiasts worldwide to explore the creative possibilities unlocked by AI-generated imagery. The 2023 edition features a single award category, making it a highly competitive event that will recognize and celebrate the very best of generative art. Participants are encouraged to submit up to five images, each created through AI-based computer programs, illustrating the seamless collaboration between human creativity and artificial intelligence.

As artists and AI enthusiasts gather to participate in this competition, they embark on a journey to explore the frontier of generative art. From fascinating abstract compositions to thought-provoking representations of the world around us, the Generative Art Award 2023 promises to be a captivating showcase of the creative potential unlocked by AI-generated imagery. Embracing a diverse range of styles and ideas, this competition stands as a testament to the unbounded nature of artistic expression when harnessed by the power of AI-driven generative art.

Entry fee: 5 EUR for each image submitted.

Eligibility

Open worldwide to anyone, 18 or older.

Prize

The competition offers cash prizes of 500 EUR for 1st place, 250 EUR for 2nd place, and 100 EUR for 3rd place.
