HP recently partnered with artists from all over the world like Shepard Fairey, Aaron Draplin, Laura Callaghan, Noma Bar, Jessica Hische and Kanae Sato to create a gallery of printable posters to help everyone fill their windows with hope.

Millions of people around the world are using their windows to share messages of support to the outside world. The **#windowsofhope** collection includes over 35 original posters created specifically for this unprecedented time, available as an exclusive **free download**.

Each poster comes in multiple sizes, so you can tile pages together and fill your window.

"If we can spread love everywhere, it'll help us all get through this," commented artist Benny Gold who created the piece 'Spread Love'.
