Since 1987, the **SEGD Global Design Awards** have set the standard of excellence for environmental graphic design and experiential graphic design, honoring design work that connects people to place by providing direction, content, and compelling experiences in public spaces.

Winning projects have ranged from interactive multimedia environments to complex hospital wayfinding systems and from branded corporate environments to museum exhibitions. Retail and interior projects, architectural signing, public art, design research, and books have also won awards.

There are seven main categories:

• **Digital Experience Content**

• **Exhibition**

• **Interactive Experience**

• **Placemaking and Identity**

• **Public Installation**

• **Strategy/Research/Planning**

• **Wayfinding**

A multi-disciplinary jury representing practitioners from a diversity of design disciplines, as well as clients, users, and students, will evaluate the submissions and select winning projects based on their effectiveness in connecting people to place, creating a unique and memorable user experience, and solving the client's objectives and design challenge.
